EDUCATION

Bachelor of Science, Computer Science — University of Calgary Expected Graduation: Dec 2028

- **GPA:** 3.83 / 4.00 | **Awards:** Jason Lang Scholarship (2x)
- **Relevant coursework:** Computer Networks, Fundamentals of Cryptography, Information Security and Privacy, AI and Machine Learning, Algorithm Design and Analysis, Information Technology Ethics

TECHNICAL SKILLS

- **Languages:** Java, Python, C
- **Frameworks & Tools:** JavaFX, Keras, Git, Linux / command line
- **Security & Networking:** socket programming, client-server architecture, cryptographic hashing and MACs, block cipher modes (CBC, CTR), POSIX file permissions, authentication systems, secure coding

PROJECTS

OMG Gaming Platform Mar 2025 – Apr 2025

- Built a multiplayer board game platform supporting real-time connections between multiple clients and a central host server.
- Implemented the networking layer with sockets and client-server communication to keep players connected through a live game session.

POSIX Permissions Access Resolver | Python Oct 2026

- Wrote a Python tool that determines whether a user can access a file by evaluating POSIX owner, group, and other permission bits, mirroring how Linux enforces file access control.

Expense Tracker | Java, JavaFX 2026

- Built a desktop application to track credit card spending and categorize financial transactions.
- Implemented structured data storage and input validation to keep financial records accurate.
- Designed a modular architecture so new features, such as automated categorization and spending analytics, could be added without reworking existing code.

EXPERIENCE

Footwear Lead — Under Armour July 2023 – Present

Rocky View, AB

- Led a team of 10 associates in maintaining product displays and stockroom organization, improving department efficiency by 15% and reducing restock time.
- Achieved the region's top footwear sales performance for 7 consecutive months by analyzing sales trends and adjusting floor layouts.
- Trained and mentored new associates on inventory systems and sales procedures, making onboarding 20% faster and improving department consistency.
- Introduced sales tactics and customer service practices across the store, projected to lift annual sales 10%.
